# MOHD OSAMA

**FULL-STACK DEVELOPER**

+91 6306532493 | mohdosamanoor003@gmail.com | linkedin.com/in/mohdosama03
github.com/mohdosama03

## SUMMARY

Aspiring Full-Stack Developer with hands-on experience building responsive web applications and full-stack projects. Skilled in frontend development, backend development, API integration, and database management. Strong problem-solving abilities with a passion for learning new technologies and building clean, scalable, and user-focused applications.

## EDUCATION

**Integral University** — Lucknow, UP
*B.Tech in Computer Science and Engineering; CGPA: 8.0* — *2023 – Present*

**Ziauddin Khan Memorial Senior Secondary School** — Azamgarh, UP
*Intermediate; CBSE; Score: 65%* — *2021*

**Ziauddin Khan Memorial Senior Secondary School** — Azamgarh, UP
*High School; CBSE; Score: 58%* — *2019*

## EXPERIENCE

**Softflew Technologies & Training Institute** — June 2025 – July 2025
*MERN Stack Summer Intern*

- 45-day summer training covering MongoDB, Express, React and Node.js
- Made QuickShow, a full-stack movie ticket booking app
- Worked on the REST APIs, MongoDB integration and responsive frontend

## PROJECTS

**AI Virtual Assistant** | *MongoDB, Express.js, React, Node.js*

Developed a full-stack AI virtual assistant using the MERN stack that understands user queries and generates intelligent replies. Designed a responsive React frontend with a chat interface where users can type questions and view responses. Built RESTful APIs with Express.js and Node.js to handle user accounts, including registration and login, and to process each query. Integrated an external AI API on the backend to analyze user input and return relevant responses. Designed MongoDB schemas for persistent storage of user data and saved conversation history, allowing earlier chats to be reopened and continued. Implemented loading states and error handling to keep the application stable when a request fails. Tested the endpoints and debugged the data flow between the frontend, backend, and database. Applied API integration, backend development, and database design concepts throughout the project. Used Git and GitHub for version control and organized the codebase into separate frontend and backend modules for clarity.

**Library Management System** | *React, Node.js, Express.js*

Developed a full-stack library management system using a React frontend and a Node.js and Express.js backend to replace manual record-keeping with a digital workflow. Built a responsive React interface for viewing, adding, updating, and deleting library records, with data refreshing after each operation. Structured the backend into routes, controllers, and middleware to keep the code modular, reusable, and easy to maintain. Defined routes for the API endpoints, implemented the main logic in controllers, and used middleware for request validation and error handling. Built RESTful APIs for the core library operations and connected them to the frontend through API calls. Tested the APIs to ensure each operation worked correctly from the frontend to the server. Applied CRUD operations, modular code organization, and frontend-backend integration concepts throughout the project. Validated user input to prevent incomplete or incorrect records from being saved, and used Git and GitHub for version control.

## TECHNICAL SKILLS

**Languages**: C, Python, JavaScript
**Web Technologies**: HTML5, CSS3, React, Node.js, Express.js
**Frameworks**: Bootstrap, Tailwind CSS
**Databases**: MySQL, MongoDB
**Developer Tools**: Git, GitHub

## CERTIFICATIONS

**AI using MERN Stack** – OneBigBit Technologies
**45-Day Summer Training – MERN Stack** – Softflew Technologies & Training Institute

## LANGUAGES

English, Hindi, Urdu
